SUMMARY

Third-year Computer Science undergraduate specializing in Intelligent Systems, passionate about leveraging Artificial Intelligence to build innovative, impactful real-world applications with engaging interfaces.

PROFESSIONAL EXPERIENCE

Software Laboratory Center BINUS
Part-Time Software Laboratory Assistant

- Instruct 100+ undergraduates each semester in Algorithm and Programming, Data Structures, Pattern Software Design, and Framework Layer Architecture. Create case studies, grade assignments, and assist with exam proctoring.

Alam Sutera, Tangerang
Feb 2025 - Present

EDUCATION

Bina Nusantara University
Bachelor's Degree in Computer Science | Current GPA: 3.87/4.00

- Activities:* Active Member of UREEKA (WebDev Training), Human Capital Activist of Cyber Security Community.

Alam Sutera, Tangerang
Sep 2023 - Expected Mar 2027

AWARDS & CERTIFICATIONS

AI-900: Microsoft Azure AI Fundamentals

- Demonstrated foundational knowledge of ML, AI concepts, and Azure cognitive services.

Mar 2025

Semi-finalist of IOFest Web Development National Competition

- Developed a transparent budget-tracking web app for NGOs and government organizations, *Anggar.in*, enabling easy recording, monitoring, and public verification of financial transactions.

[Demo](#) | Jun 2025

2nd place in TechFest UI/UX Competition

- Designed and prototyped *SpacePen*, a space-themed mobile pen pal app featuring seamless user flows, interactive wireframes, and high-fidelity UI/UX designs.

[Demo](#) | Jul 2024

Finalist in Microsoft AI for Accessibility Hackathon x SoCS

- Developed *AIFI*, a video conferencing web app with real-time emotion recognition and conversation summarization, designed to support individuals with ASD in boosting employability.

[Demo](#) | Jun 2024

PROJECTS

Iris - Flutter, Flask, Firebase, AI/ML (YOLOv11, Google Cloud Vision OCR, Google Cloud TTS)

- Mobile app that assists elderly and visually impaired users with real-time object and text detection, providing on-screen reading or speech-based guidance for daily activities.

[GitHub](#)

Meth - React.js, Flask, AI/ML (CNN, self-trained LeNet)

- Web platform that leverages a self-trained LeNet model with an F1-score of 0.98 to detect and solve handwritten math problems, delivering instant, step-by-step solutions from uploaded images.

[GitHub](#)

Cura - React.js, Flask, ICP/Motoko, AI/ML (Fetch.ai agents)

- Decentralized healthcare application built on the Internet Computer Protocol (ICP) that deploys AI agents to provide intelligent doctor, pharmacy, and wellness services through a secure web interface.

[GitHub](#)

Leafy - React Native, AI/ML (Tensorflow.js)

- Mobile app to identify plant species and instantly provide plant care and health insights for casual growers.

[GitHub](#)

SKILLS

Programming	C, Python, Java, SQL <i>Familiar:</i> C#, JavaScript, TypeScript
Frameworks	React.js, Next.js, Tailwind CSS <i>Familiar:</i> ASP.NET, Flask, Flutter, React Native
AI/ML	Deep Learning, Natural Language Processing, Computer Vision, Speech Recognition
Tools	Git, Firebase, Visual Paradigm, Figma, Blender
Soft Skills	Creativity, Collaboration, Problem Solving, Attention to Detail, Empathy

PUBLICATIONS

Comparing LLMs and NMTs Performances in Translating English–Indonesian Texts
Procedia Computer Science, 2025 (*Indexed in ScienceDirect / Elsevier*)
